Thank You for Your Thyme: Appreciation Event had Great Turnout

...by Joe Jennings, Extension Master Gardener and Foundation Board Member

On Saturday, October 21, over 120 Extension Master Gardeners, friends and family attended the 2023 "Thank You for Your Thyme!" Fall Member Appreciation Event at Bellevue Botanical Garden. Co-hosted by Program Coordinator Sarah Moore and Foundation President Joan Baldwin, the luncheon event recognized, celebrated and brought together Master Gardeners as individuals, duos and teams who made a difference for the WSU Extension King County Master Gardener Program in 2023.

Holiday Gift Giving!

Watch for our 2024 class registration links in early December

Growing Groceries Classes and Bellevue Demonstration Garden Workshops will begin again in January 2024. Both of these educational series will have new topics and speakers in addition to past favorites.

Growing Groceries (GG) 2024 will offer 12 classes in spring and fall of 2024. New GG topics will include “Extended-season Techniques” and “Soil-to-Table Tips”.

Bellevue Demonstration Garden Workshops (BDGW) 2024 will offer 22 classes in the spring and fall of 2024. New BDGW speakers and topics will include Richie Steffen, Executive Director of the Elisabeth Carey Miller Botanical Garden presenting “Ferns” and Ross Bayton, Garden Director at Heronswood Garden presenting “Choosing Conifers for Color.”

Watch for the 2024 GG and BDGW registration links in your email in early December... just in time for your holiday giving! Subscriptions to these fantastic educational series make a great gift and will keep on giving throughout 2024.

Farewell from a Longtime Master Gardener

...by Extension Master Gardener Emily Bishton

Dear Fellow Master Gardeners,

After 28 years as an Extension Master Gardener – mostly involved with youth and family garden education programs – I’ve decided to retire and bid you all a fond “fare-thee-well”. I still remember with gratitude, way back in 1996, the veteran Master Gardeners James Jackson, Nancy Radcliffe, Marilyn Tilbury and others who took me under their wings at the Rainier Ask-a-Master-Gardener Clinic and mentored me on positive ways to deliver public education. Their friendship and inspiration will never be forgotten, along with all the school and youth garden leaders, volunteers and kids I met during my first 10 years as a Master Gardener, traveling to gardens all over King County and beyond.

Foodies in the Garden

This is the latest in an occasional series of articles about what we do with the plants that we grow for food.

A House Plant from the Produce Department of an Asian Market?

...by Extension Master Gardener Bruce Caredio

Many of us remember when our mother saved an avocado seed, stuck three round toothpicks in it, and suspended the seed partially in a glass of water. With some luck, the avocado "pit" would eventually sprout roots and send up a stem sporting green, narrow, pointed leaves. Some of these seedlings were hardy enough to make the transition to a pot with soil and kept growing. Sensitive to cold temperatures in northern latitudes, most of

the seedlings presented indoors. Well, there is a new twist to the houseplant from the market's produce department. A handsome, inexpensive houseplant can be grown from the tuber commonly called a "hairy potato" or Satoimo, a taro.

Taro, *Colocasia esculenta*, is grown in the tropical regions around the globe in Asia, Africa, the Mediterranean, and South America. In Japanese, the name Sato Imo translates to "homeland potato". Satoimo grows wild in Japan and parts of Southeast Asia. It is a small type of taro known scientifically as *Colocasia esculenta var. antiquorum*. The root crop may have been grown in Asia as far back as 14,000 years ago and was an essential part of the diet before rice became widely cultivated.

Fire-Resistant Landscape Gardening: *Fall Maintenance & Pruning*

...by Joe Jennings, Extension Master Gardener and Foundation Board Member

On October 21, Bellevue Demonstration Garden Workshops presented *Fire-Resistant Landscape (FRL) Gardening, Fall Maintenance and Pruning*. The workshop was taught by Extension Master Gardener Joe Jennings with Mike Lasecki, Program Coordinator, Wildfire Preparedness Program, King Conservation District and Connor McDermott, Board President, PlantAmnesty collaborating. Fire-resistant landscape gardening is the use of drought-tolerant, ecologically and location appropriate plants, materials, design and maintenance, to prevent the spread of fire to your home. This class focused on first-year FRL gardeners, teaching them how to keep the landscape zones closest to their structures lean, green and clean. The workshop introduced accepted pruning practices and contacts for pruning resources and classes.

Become a Docent at Bellevue Botanical Garden

Our partner, Bellevue Botanical Garden and Society, will start another docent training class in February 2024. Applications to join this class are available from Rhoda at rhodas@inteum.com. Presently, five Extension Master Gardeners are amongst the roughly 30 docents who provide both scheduled and unscheduled tours at the Garden. While time served as a docent does not count as service or other hours for the WSU Extension King County Master Gardener Program, it is a very rewarding role.
