

# King County Master Gardener Program

## Presentation:

### “The Hidden Ecosystem at Home: Gardening for Biodiversity in a Changing World”

Washington’s biodiversity is extraordinary — and increasingly at risk. This talk explores the current state of biodiversity, the ecological processes that sustain life, and the disturbance regimes reshaping ecosystems. Discover how your backyard can provide food, water, shelter, and space for wildlife, and learn simple, powerful ways to garden for change and ecological resilience.

By Alma Cardenas, EMG, Climate Action Team

August 14, 2026

## Resources.
