Growing Knowledge at the Intern "Learn and Work" Days

...by Penny Kriese, Master Gardener and
Thyme Patch Park Demonstration Garden
Lead

Introducing new King County Master Gardener interns to the demonstration gardens across the county is a key part of each year's training. This year, the Intern

"Learn and Work" Days took place on March 19 and 26, the last days of Master Gardener training.

Garden Leaders shared photos and stories of the activities during this year's Intern Days in their gardens.

King Conservation District Soil Testing Update

When working with a client, in some situations, it can be important to encourage a basic soil test. When this is necessary, your clinic bins have a useful Tip Sheet as well as a flyer from King Conservation District (KCD), our soil testing partner, which you can provide to clients. We've learned that KCD has made two significant changes to their procedures.

- The soil sample size requirement is now three pounds. This is an increase from what it was in the past.
- Each resident in the KCD service area is eligible for a total of five free, basic soil nutrient tests for properties they own or rent. Additional tests are now \$25 (up from \$20).
- As in the past, the cities of Enumclaw, Federal Way, Skykomish, Milton and Pacific are outside the KCD District service area, but their samples can be processed for the \$25 fee.

The link to KCD soil tests on Tip Sheet #1 (Gardening Websites <https://extension.wsu.edu/king/tip-sheet-1-gardening-websites/>), and on the KCD soil test flyer in your bins is still <https://kingcd.org/programs/better-soils/healthy-soil/>. This link will direct to the updated information on the KCD website. Your CICs have been asked to ensure any existing KCD Soil Sample Information flyers have been updated with the new sample size and cost information.

Extend Your Resources

Discovery reveals how fungi bypasses plant defenses, kills plants

...article by Scott Weybright, WSU College of Agricultural, Human and Natural Resources

A team led by the U.S. Department of Agriculture's Agricultural Research Service and Washington State University researchers has discovered a protein that the fungi, *Sclerotinia sclerotiorum*, uses to bypass natural plant defenses. *Sclerotinia* causes damage in more than 600 plant species including many food crops.

Read more about this discovery in the full article [here](#).

This article was originally published in the *WSU Insider*, Washington State University.

Looking for Help With Your Gardening Questions?

The Plant Answer Clinics and Demonstration Gardens staffed by the WSU Extension Master Gardeners will be opening over the next few weeks. Bring your gardening questions to the Plant Answer Clinic near you and get expert advice, plant identification, and help with plant problems. WSU Extension Master Gardeners will make recommendations based on scientifically sound gardening principles.

See for yourself how to grow your own food and put into practice research-based gardening guidance. Our demonstration, outreach, and youth gardens offer different experiences.

Use our Map of WSU Extension Master Gardener Clinics and Gardens to locate a clinic or garden near you: <https://mgfkc.org/resources/map-of-mg-clinics-and-gardens>.

Note that opening days and times vary by location.

Elisabeth C. Miller Library Selection

Flora of the Pacific Northwest: An Illustrated Manual

Flora of the Pacific Northwest, written by botanists C. Leo Hitchcock and Arthur Cronquist, is a comprehensive reference guide of native and introduced vascular plants found throughout the Pacific Northwest. This completely revised second edition, which was published in 2018, has been updated to include 1,000 more taxa and more

than 1,300 more illustrations than the first edition. The species' descriptions and illustrations are embedded within taxonomic keys (an important innovation when the book was originally written in 1973). This is an essential book for both the professional botanist and amateur gardener. Brian Thompson, Curator of Horticultural Literature, reviewed the book.

Continuing Education Opportunities

What Counts as CE?

Classes that will improve a volunteer's knowledge and skill base for performing work as a horticultural advisor and serving as a resource on issues of sustainable gardening for home gardeners.

Staying Smart! Education Opportunities

Master Gardeners can earn Continuing Education credit from a wide selection of online classes, webinars, and online workshops. Check out the offerings on the MGF Education page: <https://www.mgfk.org/education>

Growing Groceries Classes

Growing Groceries classes are Wednesdays, 7:00 p.m. to 9:00 p.m. Please visit the [Growing Groceries](#) page for information and registration for all classes.

May 4: Integrated Pest Management: Bugs, Beneficial Insects and Plants that Support Them, presented by Master Gardener Brandon Bray.

May 18: Summer and Winter Squash, Beans & Corn, presented by Master Gardeners Emile Castle and Carol Johnson.

June 1: Global Vegetables, presented by Master Gardeners.

Bellevue Demonstration Garden Workshops

Workshops are Saturdays, 9:30 a.m. to 10:30 a.m. Pre-registration is required. For information and details, please visit <https://www.mgfk.org/education/bdg-workshops>.

May 14: Perennials for Year-Round Color, presented by Master Gardener Cleo Raulerson.

May 21: Gardening with Children, presented by Master Gardener Pauline O'Rourke.

June 4: Growing Roses, presented by John Hamerling, Master Rosarian.

Washington State University Clallam County Extension

June 9: Tips for Diagnosing Tomato Plant Problems to Set You on Your Way Towards Solving Solanaceous Crop Problems, presented by WSU Extension Diagnostician Jenny Glass. Find more information [here](#).

Bellevue Botanical Garden

BBGS members receive a 30% discount on most webinars, lectures and classes. More information at <https://bellevuebotanical.org/learn/?all-events>.

May 5: Fall and Winter Edibles presented by gardener and author Bill Thorness.

May 18: Hardy Orchids in the Garden: At the Intersection of Beauty and Conservation, presented by Peter Zale, Ph.D.

June 2: The History and Art of Bonsai presented by Master Gardener Bruce Williams. *(King County Master Gardeners may sign up for this class at a discounted rate of \$10.50. The discount is for this class only.)*

Washington Native Plant Society

May 5: Update on the Seattle Area Sword Fern Die-off, presented by Dr. Tim Billo, lecturer with the University of Washington Program on the Environment. This free event will be offered online via Zoom. Please register to attend through the event web page: <https://www.wnps.org/cps-events/calendar/1555>

Contributing to The Connection

Do you have an event or CE opportunity to share? An article of interest to Master Gardeners? Deadline for announcements or article submissions is the 10th of the month prior to publication (ex: May 10 for the June edition). For more information or to submit items for consideration, please contact us at communicate@mgfkc.org. All published photos have the photographer's permission or are sourced from free-to-use sites.

WAIT! Don't unsubscribe from all mailings if you are an active Master Gardener!

If you wish to unsubscribe, be selective and identify the email lists you wish to receive. **All active Master Gardeners in King County are expected to subscribe to the current year's "KC Master Gardeners" Email List** to continue receiving information about Program activities, updates and recertification notices. Other email lists are optional.

The Master Gardener Connection is a joint publication from the King County Master Gardener Foundation, a 501(c)(3) nonprofit, and the WSU Extension Master Gardener program in King County to provide research-based education about urban horticulture to the residents of King County.
